Why U8⁺ V11.1

- 1 Total Business Solution**
126 modules cover all lines of business including finance, supply chain, HR, sales, marketing and etc.
- 2 All Industrial Solutions**
U8⁺ provides 10 main industry solutions (machinery, electronics, transportation, garment, chemical, life sciences, F&B, wholesale distribution, service, logistics) and 220+ sub-industry solutions, used by 600,000+ enterprises.

- 3 Powerful Platform**
U8⁺ does not only help enterprises to achieve precise management, but also adapt better to the rapid change by utilizing the platform, which supports new technologies such as integrated E-commerce, CRM and barcode management.
- 4 Easy Deployment**
Taking the advantage of the unified application platform, enterprises can easily deploy new applications according to specific requirements at each development stage.

- 5 Rapid Implementation**
The deployment model of U8⁺ implementation is designed for speed and transparency. The Implementation Navigator helps to reduce the time of implementation, enhance staff IT capacity, and support continuous software optimization.
- 6 Superior Service & Support**
Based on Yonyou's cloud-base service platform and abundant local support resources all over the world, the "Green Desktop" deployed in client allows users to access to massive information on Yonyou cloud and to achieve real-time communication with Yonyou professionals. Yonyou keeps on providing consistent and seamless support you need to accomplish application and simplicity improvement.

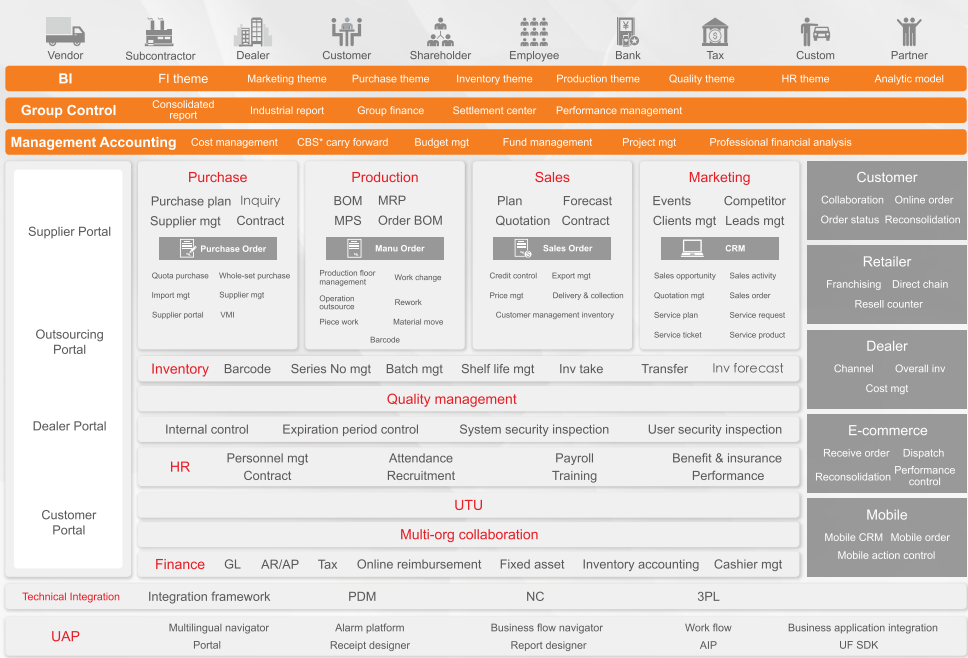

yonyou U8⁺ 10 Business Solutions

Overview

Leaping from traditional ERP mode to the "software + cloud" mode, the new Yonyou U8⁺ establishes a Unified Application Platform (UAP) for growing business to achieve precise management and agile operation on cloud base. The special "software + cloud" mode also assists managers to ease their daily work with high flexibility, make more intelligent decisions and realize closer collaboration within the organization. Developed on the powerful UAP, U8⁺ not only provides All-in-One solutions for 10 main business lines, but also supports various applications such as E-commerce. Embracing massive successful customization experiences on UAP, the new U8⁺ offers wide ranges of cloud applications in collaboration with various ecosystem partners aggregated in the Developer Community. Last but not least, using the U8⁺ Service Community, clients are provided with multiple methods of interaction with Yonyou professional support and service team.

Product Application Structure

Finance

Being the basic application in the U8⁺ system, financial accounting plays as a vital role in the daily financial work of a CFO. FI modules include GL, AR/AP, UFO report, cashier, receipt mgt, online reimbursement, online banking and etc..

Automated financial processes.
Strict internal control and risk mgt.
Sophisticated financial analysis and business tracking.

Manu-
facturing

As the core application in the U8⁺ system, manufacturing helps growing manufacturing companies to sync internal production with demand, facilitate internal collaboration and streamline production process.

Complete BOM lists: support various kinds of BOM lists of different businesses; monitor and control the entire process of the establishment of BOM lists.
Comprehensive production plan modules: cover 5 main production plan modules: MPS, MRP, BPP, SRP and LRP; meet variety of demands from different types of manufacturers with high flexibility.
Effective shop-floor mgt: management on production process plan, production capacity control, operation-based MTO allocation and barcode helps to avoid chaos in plant floor and to easily monitor and track production progress.

Product
Lifecycle

U8⁺ PDM helps enterprises streamline product lifecycle management. While building compliance into the processes, it helps companies create competitive products and greater insight into market opportunities.

Standardized R&D process.
Real-time project mgt.
Streamlined R&D to manufacturing process.

Multi-org
Collaboration

U8⁺ OA helps companies to manage their organization and enhance multi-org collaboration with flexibility, comfort, ease and security, resulting in standard collaboration regulations and healthy organization cultures.

"People-oriented" multi-org management platform.
Multi-system integration, eliminate information isolation.
Process standardization, online approval, fast decision making.

Budget

U8⁺ budget mgt consists of budget system setup, budget planning and adjustment, budget control and budget enforcement analysis, making enterprises effectively tackle the mgt problems of planning, collaboration, control and motivation.

Sound budget mgt system.
Lifecycle budget control.
Comprehensive budget enforcement analysis.

Supply
Chain

U8⁺ SCM enables companies to achieve finance-operation integrated mgt through putting these two applications together, enhancing mgt effectiveness and efficiency.

Barcode mgt integrates both hardware and software.
Finance-operation integrated applications.
Tractable supply chain analysis.

Customer
Relation

U8⁺ CRM is another core application of U8⁺. It looks at the needs of marketing and helps them to manage and analyze the whole process of sales and marketing.

360° clients information integration.
Agile management of sales actions and processes.
Integrated sales and marketing costs management.

HR

U8⁺ HR makes enterprise achieve comprehensive operation management, from daily work (payroll and attendance) to recruitment, training and performance. It brings agile HR management to the companies by engaging staffs throughout the process.

Effective human resource cost control.
Comprehensive performance management.
Establish a HR system which integrates with business operations.

Cost

U8⁺ cost management builds up a multi-dimensions agile cost control system for enterprises. It not only supports calculating the manufacturing cost of each product and optimizing cost breakdown structure, but also enables agile cost control and decision-making analysis.

Support actual cost and standard cost accounting.
Support total cost/breakdown cost carry-forward.
Support goods shipped in-transit and collecting by installment.

Fund

U8⁺ fund management provides companies with precise fund forecast, fund raising/investment, fund interests calculation and fund analysis applications, thus enhancing effectiveness of utilizing funds and preventing from operation risks.

Precise fund forecast.
Multi-channel fund raising/investment management.
Unified fund interest calculation management.

yonyou U8⁺ Industry

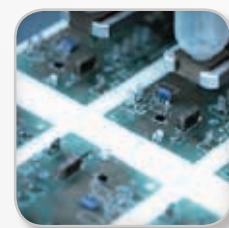

Yonyou U8⁺ Industry Solution, built on Yonyou and its partners' rich experiences of the best management practices in each industry, helps the enterprises fast deploy with low risks. Yonyou U8⁺ Industry Solution covers ten main industries including machinery, electronics, transportation, garment, chemical, life sciences, F&B, wholesale distribution, service and logistics, and more than 220 sub-industries.

Machinery

U8⁺ Machinery Solution focuses on agile manufacturing and precise planning. It supports various manufacturing modes such as manufacturing by order, assembling by order and large volume customized manufacturing. With U8⁺ Machinery Solution, companies can build up a centralized control platform and enhance its core competitiveness.

Key application: PDM interface, mould mgt, BOM query, inquiry and price parity, cost breakdown, presale evaluation, job ticket dispatch, engineer change mgt, ATS interface...

Electronics

U8⁺ Electronics Solution focuses on the collaboration and management along the operation process from procurement to cost control. It achieves the real-time information sharing among the players in the supply chain, eliminating of demand fluctuation, reducing cost and accurate order fulfillment.

Key application: capacity planning, ECN change mgt, returnable packaging, procurement inquiry, mould mgt, dispatch order, alternative item mgt, BOM query...

Transportation

U8⁺ Transportation Solution aims to build up a highly effective motor eco-system with the concept of agile management. With the foundation of strict quality track, the system helps the companies reduce cost and fulfill order on time.

Key application: supply chain collaboration, Kanban mgt, capacity planning, consignment mgt, VMI procurement, EDI, PDM, and MES interfaces...

Garment

U8⁺ Garment Solution is built on the advanced management modes in the garment industry. It solves the core problems in all lines of business (sales channel control, E-commerce management, supply chain management, planning, shop-floor RFID data collection, cost accounting, etc.) and therefore establish an agile and precise management platform with best practices in garment industry for enterprises to leverage on.

Key application: material forecast, order whole life cycle mgt, sample mgt, manufacturing planning, BOM mgt, asset mgt, job ticket mgt, piece wage, progress track, barcode app, packing & shipping mgt...

Chemical

U8⁺ Chemical Solution fulfils the fundamental requirements in the industry including bulk procurement, quality-based price calculation, barcode management, manufacturing data monitor, asset management, quality management and cost management. It aims to enhance company's ability to adjust itself to the fast changing market and to maintain the high safety-level manufacturing.

Key application: quality mgt, measuring instrument mgt, bulk raw material procurement, budgeting, logistics mgt, presale cost analog, MES, receipt confidentiality mgt, asset mgt...

Life Sciences

U8⁺ Life Sciences Solution focuses on GMP quality management, in-depth sales & marketing management and precise cost management to help pharmaceutical companies achieve agile internal management and collaborative external supply chain control through aligning upstream suppliers, downstream resellers and end-users.

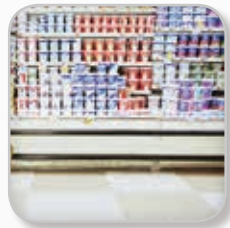

Key application: material balance, batch tracing, clearance management, GMP/GSP standard, channel mgt, settlement management (return & commission on sales), sales representative management, expenses budget & reimbursement...

Food & Beverage

U8⁺ F&B Solution covers total management of food safety, supply chain, manufacturing cost, distribution, budgeting and collaboration. It is suitable for the special features of F&B industry such as flexible planning, precise cost control and various marketing methods, enabling the enterprises to grow stronger and bigger.

Key application: quality control, batch tracing, channel mgt, expire date control, distribution, commission mgt, transportation mgt, receipt mgt, quality tracing, procurement mgt, packaging mgt, barcode application...

Wholesale Distribution

U8⁺ Wholesale Distribution Solution is a collaboration-oriented solution which facilitates up-to-downstream operation with the foundation of the integrated internal operation process to enhance the supply chain competitiveness of the companies.

Key application: batch tracing, sales channel mgt, expire date control, resell & distribution, commission mgt, logistics mgt, receipt mgt, quality tracking, packaging mgt...

Logistics

U8⁺ Logistics Solution streamlines whole-process operations including warehouse, road transportation, supplier, freight, customs clearance, bonded logistics, value-added logistics works and etc., providing logistics companies with solid foundation for fast-track supply chain operations.

Key application: freight mgt, custom clearance, order mgt, E-service, EDI...

IT Services

U8⁺ IT Services Solution realizes the collaboration of project management and organization management, establishes a scientific project management system which controls projects in an all-round way (objectives, plans, progresses, resources, costs and risks control), enhances the project implementation effectiveness and its successful rate, and strengthens companies' business management abilities.

Key application: IT project mgt.
